

The FCM Principle

A New Cosmology Combining the Geocentric and Heliocentric Theories

by Francis C Marino

May 13, 2022

Feast of Our Lady of Fatima

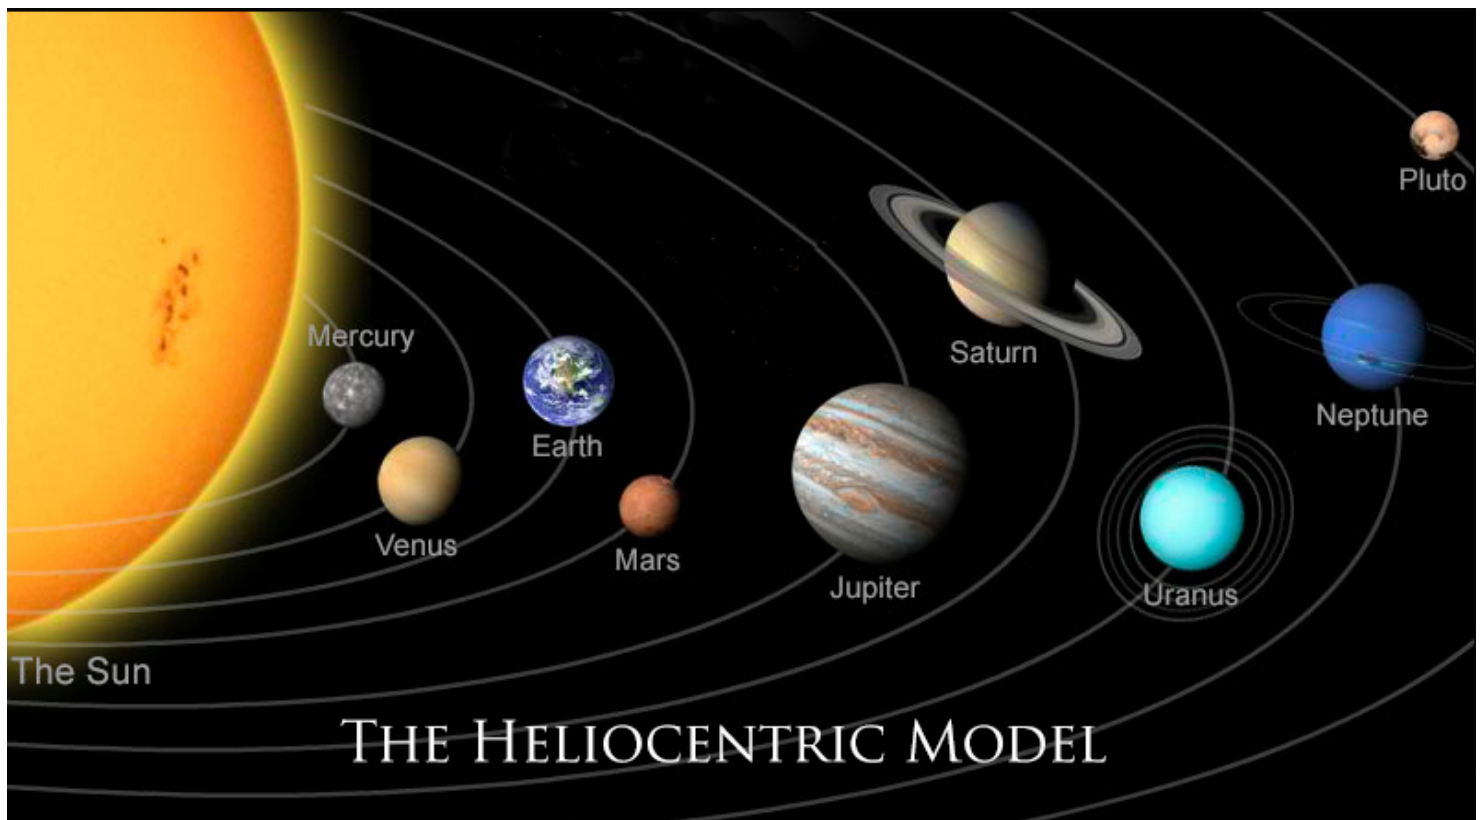

1. The Earth was created by God *and physically located at the geometric center of the entire Universe!*¹
2. God also made our Earth *rotate on its own axis* at the *geometric center*, giving us our *Night and Day* every 23 hours, 56 minutes and 4.1 seconds.²
3. The (8) additional planets in our Solar System are *telescopically* observed from Earth to *individually* rotate around our Sun at different distances from it and with elliptical orbits. Concurrently, the Sun orbits the Earth, making one revolution every 365.25 days, giving us one Solar Year.²
4. It has been previously defined that the *Ecliptic* (i.e. the orbital plane) of our Solar System is tilted 23.44 degrees from the Earth's Equator, causing the four changing seasons.³
5. The Earth being *Fixed in Space* and also *Rotating on its Axis*, are demonstrated by two important experiments of the 19th and 20th Centuries. First, *The Michelson-Morley light experiment of 1887*, indicated no significant movement of the Earth through space, (which is absolutely necessary in the Heliocentric Theory.) Some years later, *The Michelson-Gale-Pearson light experiment of 1925* demonstrated *only Rotational Earth movement*, almost identical to *the distance of one Axial Rotation of the Earth in one Sidereal Day.*⁴

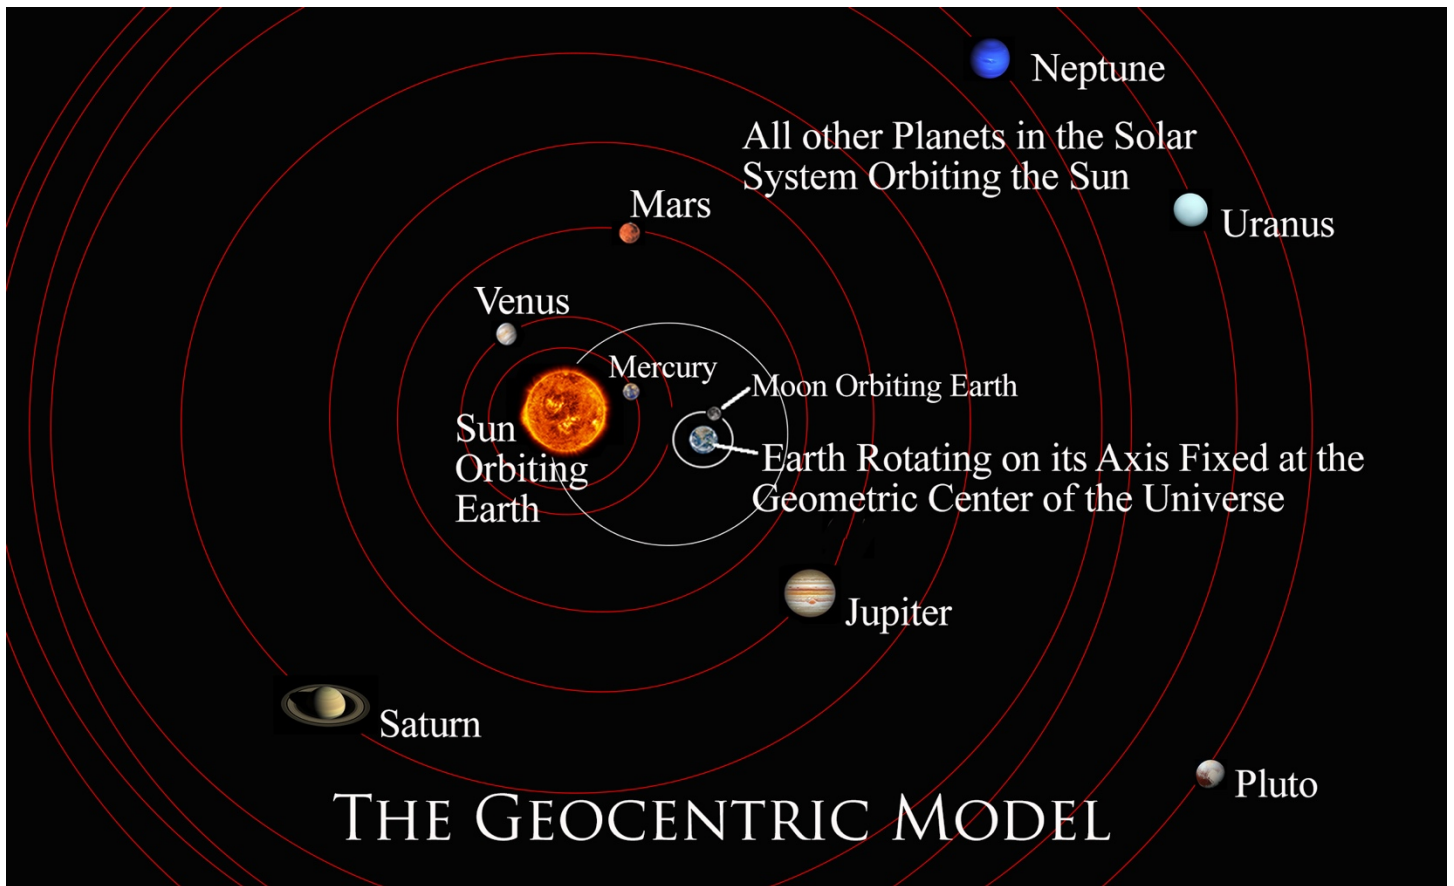

6. The Earth is viewed from one million miles by the DSCOVR (Deep Space Climate Observatory) Satellite, which orbits about a million miles from Earth in a unique location called *Lagrange point 1*, which basically allows it to hover between the Sun and our planet. The spacecraft's EPIC camera takes a new picture of Earth every two hours which verifies that the Earth, in fact, is rotating on its axis.⁵

7. The *remaining galaxies and stars in the universe* are observed to be Red-Shifted and, therefore, receding from the Earth, indicating an Earth *fixed at the geometric center of the universe*.⁶

8. NASA's Cosmic Background Explorer (*COBE*) launched in 1989, and the Wilkinson Microwave Anisotropy Probe (*WMAP*) launched in 2001 indicate that the *Cosmic Microwave Background* had a Polarity aligned with the Earth's Equator, and the whole universe was divided into a Northern Hemisphere and a Southern Hemisphere, crossing the Earth's Equator.⁶

Existing Heliocentric Model and The New Geocentric Model

I wish to thank *Dr. Robert A. Sungenis* for his Monumental works: *Gallileo Was Wrong*, *The Church Was Right*, *The Principle*, and *Journey To The Center Of The Universe*.

Dr. Sungenis' findings have inspired me to draw new conclusions regarding the Creation of The Heavens and the Earth and also the place the Earth holds in our Solar System and the *entire* Universe. Using his well-researched and published data , I have surmised a nuanced version of the *Geocentric Cosmology*, which has never been put forward until now.

The *Geocentric Model*, was previously approved by The Church, but was subsequently attacked and obscured following the advent of the *Heliocentric Controversy* during the time of Galileo. Like Dr. Sungenis, I believe the Church was correct in its upholding the Geocentric Model in spite of certain claims made by the Renaissance Astronomers. These new scientific findings, based solely on new telescopic

observations, led them to a myopic view of the Universe. While they improved upon the outdated *Ptolemaic Geocentric Model*, they drew certain conclusions I believe to be erroneous, namely, that *the Earth orbits the Sun*.

Later Astronomers, in attempting to conform to the newly developed *Newtonian Laws of Gravitation*, wrongly concluded that the Earth *must* orbit the Sun, since the smaller orbits the larger. However, this would not be true *if* the Earth were the *Center of Mass* of the *entire* Universe.

With the arrival of Space Technology, such as the *Cosmic Background Explorer (COBE)* launched in 1989, and the *Wilkinson Microwave Anisotropy Probe (WMAP)* new findings began to reconfirm a *Geocentric Universe*. However, here I part with Dr. Sungenis who claims *absolute immobility* of the Earth. In my *New Cosmology*, I believe I am gathering together and presenting in an altogether new synthesis, what new scientific evidence has recently confirmed to be correct. For the first time in one contiguous theory, I am claiming both a fixed Earth that does not orbit the Sun, and one which rotates on its axis, (cf. *The Michelson-Morley light experiment of 1887*, *The Michelson-Gale-Pearson light experiment of 1925* and the findings of the *DSCOVR [Deep Space Climate Observatory] Satellite* photos.)

Therefore, *I am combining the two theories of Geocentrism and Heliocentrism*. Dr. Sungenis' *Non-Rotating Earth Geocentrism*, requires excessive speed Movements by the Sun, Planets and Stars. On the contrary, we do not perceive occurring anywhere else in our Universe, this type of hyper-light-speed movement. In fact, we only observe telescopically from Earth calm movements in the celestial heavens. My theory, however, introduces a rotating Earth into the *Geocentric Model* (cf. *The Michelson-Gale-Pearson light experiment of 1925*), which validates a more serene and thus reasonable movement of the Sun and celestial bodies. Interestingly enough, all of the other planets in our solar system maintain a rotation of varying periods on their often tilted Axis, as I claim our Earth does.

This all new cosmology, which I am labeling for brevity *The FCM Principle*, was derived from my knowledge of Physics, Mathematics and my years of experience as an engineer and inventor. But most importantly, I am building on the breakthrough

findings researched and compiled by the genius of Dr. Sungenis, whom we cannot thank enough for his exhaustive work !

The FCM Principle is in no way to be considered aligned identically with the opinions of Dr. Sungenis. He holds the Earth to be *free of any and all movement*, either through our Solar System, or any rotational movement on its axis as held in the *Heliocentric Theory* and *The Big Bang Theory*. The nuance of my new theory of *Geocentrism* is that the *Changing Seasons* derive from the Sun making one revolution around the earth every year. Since I maintain that the Sun's path about the Earth is at an angle of 23.44 degrees from the Earths' Equator, this would account for our Summer and Winter Solstices and the Spring and Fall Equinox. But contrary to Dr. Sungenis, I maintain that Night and Day are the result of the Rotation of the Earth on its Axis, causing the apparent rising and setting of the Sun and the movement of the Stars. All things being considered, I still hold that I am conforming to Sacred Scripture which says : *Let all the earth be moved at His presence : for He hath founded the world immoveable.* (I Paralipomenon 16:30), since the Earth is *fixed in the Geometric Center* of the Universe and *it shall not be moved* from it !

I leave this *New Cosmology* up to the infallible judgement of The Holy Roman and Apostolic Church, which I submit to in its entirety, in this and all matters, both in regard to Faith And Morals and furthermore, I submit to all its Dogmas completely. Once again, I wish to thank Dr. Robert Sungenis, whose great work, *Journey to The Center Of The Universe*, I have used to illustrate the various points of my New Cosmology.

The Feast Of Our Lady of Fatima

Ut in Omnibus Glorificetur Deus

Notes

¹ A newly elucidated statement, by Francis C. Marino, regarding the *Physical Location* of the Earth in the *entire* Universe and its creation by God.

² *A New Cosmology*, conforming to Sacred Scripture, by Francis C. Marino, *Electronics Engineer, Physicist and Inventor*.

³ Previously explained in the Copernican Heliocentric Solar System, the Earth is claimed to be *Tilted on its Axis* at an angle of 23.44 degrees from the North -South Pole .

⁴ One Sidereal Day is the time required for one complete rotation of the Earth on its axis with respect to a fixed star.
